### *Claim Rejections - 35 USC § 103*

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3713

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

### ***Double Patenting***

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3713

7. Claims 41-61 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 8-28 of U.S. Patent No. 6,159,018 (hereinafter as Clark et al) in view of Shapiro (U.S. Pat. No. 4,785,472). Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are board version of the patented claims and all proposed claims are obvious and included in the patented claims, and any infringement over the patents would also infringe over the instant claims. It is noted that the recitations of the "data items" (as per claims 41-61), "data items created by persons in order to demonstrate material contained within the data items", "a plurality of data items created by persons", "the data items each comprising an electronic representation of at least a portion of a person's work product" (as per claims 41, 48 and 55), "incorrect data item" (as per claim 51) and "correct data item"(as per claim 51) are the obvious alternative languages since these merely describe the "answer", "answers to tests in order to facilitate teaching of material contained within the test", "a plurality of answers to test questions", "the answers each comprising an electronic representation of at least a portion of a test answer", "incorrect answers" and "correct answers" (as per claims 8-28 of Clark et al) in boarder terms. Hence, the instant claim does not differ from the scope of the patented claims 1-4. In 214 USPQ 761, *In re Van Ornum* and *Stang*, broad claim in the continuing application were held to be obvious double patenting over previously narrow claims. It is noted that the teaching of Clark et al does not specifically disclose the distributed computer network (as per claims 41, 48 and 55) as required. However, Figs. 1-4 of Shapiro teaches that such feature of the distributed computer network (see the abstract) is old and well known, and is considered an arbitrary obvious design choice. Hence, it would have been obvious to one of ordinary skill in

Art Unit: 3713

the art to modify the system of Clark et al with the feature of the distributed computer network as taught by Shapiro as both Clark et al and Shapiro are directed to the system and method for processing categorized data items created by persons in order to demonstrate material contained within the data items, so as to provide the data items over the computer network.
